# Distinctive awnings designed to enhance your lifestyle

## SUNBLINDS

Cut your air-conditioner usage and go *green* with SUNBLINDS that keep your home cool and comfortable, provide privacy and are the best protection against the damaging effects of the sun on your furnishings and carpet.

With elegant styles designed to suit every window, models include Drop Arm (pictured left), the snug-fit Vertiscreen® straight drop, wire guided, upper storey and traditional canvas awnings. Motorisation is an option on most models.

Sunblinds are available in an extensive range of modern fabrics, from the best European high-tech mesh, through to blackout canvas with stripes, plains and textures to suit any taste and decor.

Hardware finishes include custom Powdercoated, anodised or grade 316 stainless steel components to complement any home and cope with the harshest environments, eg: coastal applications.

As well as optimal shade protection for your home, FOLDING ARM AWNINGS provide a distinctive and functional extension to any outdoor living or alfresco area.

Ideal for providing sun protection over outdoor areas including patios, terraces, balconies, swimming pools, cafes and restaurants, they come in an extensive range of styles and finishes, including stainless steel and cassette models.

The cantilever design, supported by strong spring tensioned arms means that, when extended, no other supports are required. Our state-of-the-art hardware systems combined with an extensive range of premium fabrics provide the ultimate in outdoor living comfort.

The luxury of this product can be enhanced with motorisation, along with wind & sun sensors, remote control or computer controlled systems.

Distinct in-built feature lighting is available with the exclusive Markilux® range.

## FOLDING ARM AWNINGS

## SPECIALTY AWNINGS & SUNSCREENS

Awnings of Distinction will design a SPECIALTY AWNING or SUNSCREEN to suit any window, door, alfresco room or pool area.

With innovative eye-catching appearance and intelligent design our first class awning systems are manufactured to professional specifications at our factory right here in Melbourne.

With a wealth of knowledge and an extensive consultation service, our aim is to provide you with a durable and functional awning that not only enhances your lifestyle but adds value to your home or business whilst providing the ultimate in protection from heat, glare and weather.

SIDE CHANNEL BLINDS are the stylish and simple answer to enclosing your alfresco living area, pergola, verandah or balcony when you need it.

Designed to suit your decor and your lifestyle, Channel Blinds will not only keep out the rain and wind, they will also dramatically reduce heat and the sun's glare and insulate your home from all weather extremes.

Available in quality canvas, acrylic or mesh fabrics. The sides of each blind run neatly in the side channels and the bottom bar securely locks down to ensure privacy, protection and usability all year round.

## SIDE CHANNEL BLINDS

GLASS ROOF & CONSERVATORY AWNINGS

Versatile CONSERVATORY & GLASS ROOF AWNINGS are the ideal solution for providing shade and heat protection to large glazed areas. They are also perfect for use as a retractable roof over open pergola structures.

The fully retractable system is motorised and has the ability to be installed flat, vertical or somewhere in between. The unit is usually fitted to the outside of the glass roof or wall and can have a variety of controls to suit individual requirements.

When in use the fabric is always under tension and does not flap around in windy conditions. These sleek units are designed for exposed conditions and can be specified where other awnings are not suitable.

EXTERNAL ALUMINIUM VENETIANS

European style EXTERNAL ALUMINIUM VENETIANS by Schenker are fully retractable metal louvres that function and tilt like venetian blinds and provide the ultimate in shading and insulation efficiency.

The louvres can be infinitely adjusted between open (horizontal) or closed position via motor which can be fully automated with wind and sun sensors.

Particularly suitable for commercial applications with large banks of windows, three to four blinds can be coupled to one motor for an economic option. With their sleek styling, Schenker external venetians are also becoming a modern choice for home builders and renovators.

CLEAR PVC ALFRESCO BLINDS

CLEAR PVC ALFRESCO BLINDS are the ideal solution for enclosing your outdoor area without creating a visual barrier.

There are many styles to suit your needs, including side channelled (pictured left), crank operation, hand rolled, rope & pulley or spring operated.

Available in clear or tint, our Clear PVC Blinds are manufactured from either .75 mm or 1mm thick Japanese premium grade clear PVC, giving you year round climate control to entertain whatever the weather brings.

CANOPIES, HOODS & WALKWAY AWNINGS create an elegant entrance for your business or home and are also a stylish solution for shading and protecting windows.

Models include the Wedge Canopy (pictured right), Dutch Hood, French Canopy, Bow/Florentine and Walkway Awnings. We offer an extensive range of waterproof and translucent fabrics, stripes, plains and textures to suit any taste and decor.

Modern signwriting techniques are available for commercial installations.

Other options for fixed awnings include Colorbond® Steel & Carb.o.lite® polycarbonate Canopies for applications where fabric awnings are not preferred or not suitable.

CANOPIES & HOODS

Folding Arm Awnings  
Specialty Sunblinds & Sunscreens  
Hoods, Canopies & Walkway Awnings  
Conservatory & Glass Roof Awnings  
Architectural Umbrellas  
Patio Shading Systems

External Aluminium Venetians

Modern ARCHITECTURAL UMBRELLAS are especially designed for cafes or restaurants and provide ideal shade and rain protection.

Styles include centre-support and side arm/cantilevered. Custom designed models can also enhance your outdoor lifestyle at home.

Modern signwriting techniques are an option for commercial installations.

Available in an extensive range of waterproof and shading fabrics.

## FOLDING ARM AWNINGS & STRAIGHT DROP AWNINGS

Retractable FOLDING ARM AWNINGS create a pleasurable outdoor entertaining area where you control the environment.

Recessed STRAIGHT DROP AWNINGS are a stylish addition to your windows and provide filtered or blockout shade.

The result is comfort and protection from heat and glare, with tremendous energy savings as a bonus!
